

# Description for X-Ray Radiation Protection Lead Aprons

Lead aprons with polyester (PVC) material are essential for radiation protection.

Our X-Ray Radiation Protection Lead Apron is designed specifically to provide maximum coverage and shielding from radiation.

Available in a medium size and 5mm lead equivalence, these innovative blue aprons ensure complete safety for medical personnel in all types of laboratories and healthcare facilities.

Not only is the apron light-weight and comfortable, it also comes with superior durability that ensures long-term use.
